

## Respirator Fit Testing Companies

---

### **Occupational Health Solutions**

Mobile Units

Mobile testing services are local, flexible, competitive and without hidden fees. OHS can provide OSHA required respirator medical questionnaire review, medical clearance certificate, base line and annual fit testing, qualitative testing, with summary report.

### **Best Fit Test**

Mobile Units

BFT offers complete respiratory protection compliance, including both Quantitative and Qualitative respirator fit testing. Quantitative testing is recommended because of its ability to give an actual respirator "fit factor" and has a greater sensitivity in detecting leaks. OSHA regulations require quantitative testing on all Full-Face Respirators.

### **Concentra**

Locations: Seattle, Spokane

Concentra provides quantitative fit tests at all our locations nationwide, and offers qualitative fit tests at select locations. Our clinicians can ensure that you comply with the new silica regulations, and that your employees are safe and healthy on the job. Talk to a Concentra representative to send your employees for respirator fit tests.

### **Northwest Response**

Mobile Units

Northwest Response comes to you. Fast easy service servicing all of Washington State via mobile unit.

[Website](#)

### **Mobile Health Diagnostics**

Location: National

Mobile Health Diagnostics provides both Qualitative or Quantitative Respirator Fit Testing on any type of respirator in use at your facility. MHD can test N-95 Filtering Face Pieces, Half Face and Full Face Elastomeric Respirators. Our on-site service eliminates the liability associated with sending your employees to an off-site immediate care facility, significantly reducing down time and helping you to keep your business running with minimal disruption. In addition, we provide virtual fit testing training via telecommunications.
